

Early Game Venture

[Early Game Venture](#) - We are an early-stage venture capital firm investing in companies that jumpstart new industries in the emerging markets of Europe. Every year we select 5 or 6 early-stage startups for a highly tailored and very intensive acceleration program. Every startup will work closely with one partner of the fund and will have access to exactly the kind of resources it needs. The selection is made on a rolling basis: no submission deadlines, no cohorts, only the best startups are accepted. We invest up to 200,000 per startup.
